SERIES > COMFORT

Tailored to your dreams

I stands for innovative | **G** stands for great | **P** stands for pools

Simplicity and character combine in IG Pools, which are as easy to install as to be personalized thanks to a wide choice of structures, shapes, coatings, accessories and a range of different water treatments, whose top quality is always a must.

STRUCTURE

WHAT MAKES IGPOOLS SERIES COMFORT INNOVATIVE?

EASY INSTALLATION

- Limited civil works
- Structure can be assembled in one day
- The structure comes in easy modules which are bolted together
- Extremely light panels

DESIGN

- Optimized for the skimmer
- Optimized for the Liner waterproof layer

WHAT MAKES IGPOOLS SERIES COMFORT GREAT?

CONSTRUCTION QUALITY

- Steel panels are built according to ISO 3497, EN ISO 2808, EN ISO 9227 and EN ISO 4628
- Tested in saline fog environment and exposed to chemical aggression, proved as the most resilient of all steel used in the construction of swimming pools
- The structure can be installed in upper floors

FLEXIBILITY

- Different radius available for curved geometries
- Different panel measures available
- Different depths available on the same pool

BUILDING A SWIMMING POOL HAS NEVER BEEN SO EASY!

I stoji za inovativni | **G** stoji za grandiozni | **P** stoji za "pool" bazen

IG Pools Comfort/Plus spajaju jednostavnost i karakter: jednostavni za ugradnju ali potpuno prilagodljivi vašim potrebama, na temelju široke ponude vezane za školjku bazena, obloge, obradu vode i ostalu dodatnu opremu; uvijek jamčeći kvalitetu proizvoda i materijala.

BAZENSKA ŠKOLJKA

ŠTO ČINI IGPOOLS LINIJU COMFORT INOVATIVNOM?

LAKA MONTAŽA

- Manji građevinski radovi
- Struktura se može montirati u jednom danu
- Struktura dolazi u jednostavnim elementima spojenima vijcima
- Elementi su jako lagani

DIZAJN

- Optimalno za skimmer
- Optimalno za liner

ŠTO ČINI IGPOOLS LINIJU COMFORT GRANDIOZONOM?

KVALITETA GRADNJE

- Čelični paneli su izgrađeni po normativi ISO 3497, EN ISO 2808, EN ISO 9227 i EN ISO 4628
- Ova je vrsta čelika testirana pomoću korozije sa solju te je izložena agresivnim kemijskim tvarima i pokazala se kao najotpornija vrsta čelika u izgradnji bazena
- Struktura se može montirati na povišenim površinama

FLEKSIBILNOST

- Imamo radijuse za pravljenje raznih ovalnih bazena
- Imamo panele u raznim mjerama
- Mogućnost različitih dubina na istom bazenu

GRADNJA BAZENA NIKADA NIJE BILA TAKO LAKA!

Different heights available

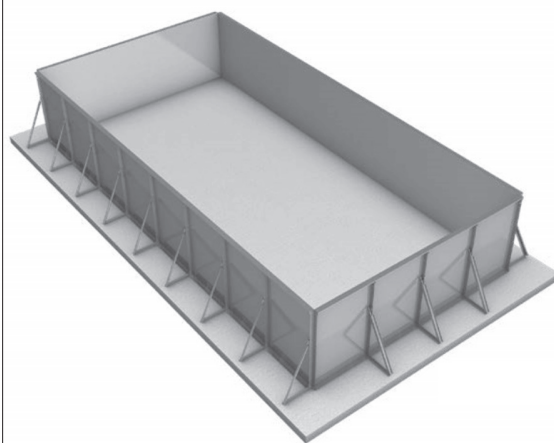

Structure can be assembled in less than a day

Available accessories: roman, square and corner staircases

Razne visine na raspolaganju

Struktura se može montirati u jednom danu

Dodatna oprema na raspolaganju: rimske, četverokutne i kutne stepenice

COATING / OBLOGA

Liner - Reinforced PVC membrane / PVC liner – pojačana PVC folija

WATER TREATMENT / OBRADA VODE

BASIC

Klasična obrada vode koji maksimizira učinak pročišćavanja i jamči sigurnost kupanja.

- Pješčani filter za pročišćavanje vode - Optimizirani mehanizam depuracije vode
- Dozator za tablete

SUPERIOR

Kemijska obrada vode visoke kvalitete.

- Laminirani filter od stakloplastike
- Kemijska obrada putem elektrolize i dozirne pumpe za automatsku regulaciju pH vrijednosti

CHLORINE FREE

Alternativa kemijskoj obradi vode na bazi klora i za sve koji imaju problema s ispustom vode.

- Dezinfekcija putem UV zraka
- Filtracija putem kartuša
- Automatski sistem za regulaciju pH vrijednosti
- Automatsko doziranje oksidansa

ULTRA GREEN

Jedinstvena solucija koja garantira odstranjivanje mutnoće i odstranjivanje bilo kakvog organskog elementa koji je veći od 0,03 microns, za najčistiju i prozirnu vodu.

- Sustav za Ultrafiltraciju, automatski s predfilterom
- Automatsko podešavanje pH vrijednosti
- Minimalno doziranje potrebnog klora (ili broma) koji pružaju veliku uštedu novca.

Bazeni IGpools se također mogu isporučiti u kompletu: kompletna oprema (bazenka školjka, obloga, sustav za obradu vode) te oblik i veličina koje su unaprijed definirane, a to jamči značajne prednosti s obzirom na vrijeme izgradnje i troškove.

BASIC

Classic treatment which maximizes purification performances and guarantees water safety

- Sand filter for water purification
- Optimized recirculation mechanism
- Chemical feeder

SUPERIOR

A classic chemical treatment of superior quality

- Filter in laminated fiberglass
- Chemical treatment with salt sterilizer and pump for an automatic pH adjustment

CHLORINE FREE

An automated alternative to chlorine-based chemical disinfection

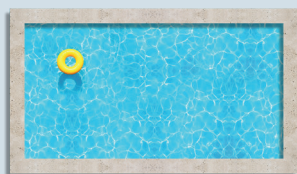

- UV disinfection
- Filtration with fine cartridge
- Automatic pH adjustment
- Automatic oxidant dosing

ULTRA GREEN

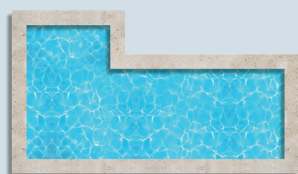

A unique solution that guarantees complete water transparency and the elimination of any substance or organism larger than 0.03 microns

- Automatic Ultrafiltration system with pre-filter
- Automatic pH adjustment
- Minimal release of chlorine (or bromine) with remarkable economic advantage

IGpools solutions are tailor made or - if required - supplied in kits.

P STANDS FOR INNOVATIVE
STANDS FOR GREAT
STANDS FOR POOLS

IGP Engineering was born in 2006 to provide engineering services in the broad water sector already covered by the thirty-year-old IGP. The company soon moved on to include more water-related services (first operated by IGP) in six different sectors (Water, Pools & Spa, Wastewater, Pumping, Biogas and Automation).

IGP Engineering operates in northern Italy and abroad, providing water-related consultancies, projects, assistance and technologies to a wide variety of clients.

Thanks to its strong experience in the design, construction and maintenance of pools, laboratory analysis included, IGP Engineering is now proud to present its own line of prefabricated swimming pools in two series and four standard designs each, made to meet all kinds of requests:

- **IGPools Series Plus**, with a concrete modular structure able to combine assembly friendliness with the resistance and customization level guaranteed by cement;

- **IGPools Series Comfort**, with a steel modular structure which combines the resistance of steel with the strength of concrete and the flexibility of liner.

Our prefabricated pools with their high standard materials and accurate design are able to guarantee a final quality on an industrial base. Moreover, the pre-set self-supporting panels that build up the pools of both series make them flexible, easy to install and resistant, reducing significantly building and maintenance costs.

In their standard dimensions all IGPools can be delivered "fully engineered", thus including the complete installation kit. Edges, internal coverings, pumps, pumps, filters, equipment, electrical cabinet, valves, pipes, skimmers and consumables such as mastics, gaskets, etc. can be all provided in one easy solution.

Are you dreaming of a pool? Well, with IGPools your dream has never been so close to reality!

IGP Engineering nastaje u 2006-oj godini da bi osigurala inženjerske usluge u širokom vodenom sektoru (usluge koje je već trideset godina pružala firma IGP). Firma se je zatim usmjerila na pružanje više usluga na šest različitih polja vodenog sektora (Voda, Bazeni i SPA, Otpadne vode, Crpljenje, Bioplin i Automatizacija).

IGP Engineering je aktivna na području sjeverne Italije i u inozemstvu te pruža konzultantske usluge u vodenom sektoru, vrši projektiranje, održavanje i daje tehnološke solucije širokom spektru klijenata.

S dugogodišnjim iskustvom u projektiranju, izradi i održavanju bazena (uključujući i analizu u laboratoriju) IGP Engineering ponosno predstavlja vlastitu i jedinstvenu liniju montažnih bazena koja će se sastojati od dva različita tipa a svaki će tip biti dostupan u četiri verzije za svačije zahtjeve:

IGPools linija Plus, s modularnom strukturom od betona koji garantira lako montiranje, visoki stupanj otpornosti i mogućnosti personalizacije.

IGPools linija Comfort, s modularnom čeličnom strukturom koja spaja čvrstoću čelika i izdržljivost betona te raznovrsnost liner-a.

Visoki standard i kvaliteta materijala te savršeni dizajn naših montažnih bazena, garantiraju finalnu kvalitetu na industrijskoj razini. Povrh toga, već ugrađeni samostojeći držači (koji su dio obje linije bazena) čine naše strukture fleksibilnijima, jednostavnijima za montiranje i otpornijima te značajno smanjuju troškove montaže i održavanja.

U standardnim dimenzijama, svi IGPools Bazeni mogu biti isporučeni s kompletnom inženjerskom solucijom, uključujući tako i kompletni set za instalaciju. Rubni kamen, obloga, pumpe, filteri, oprema, sistemi za doziranje, električni ormarići, ventili, cijevi, skimmeri i potrošni materijal kao mase za brtvljenje, brtve, itd. sve može biti isporučeno odjedanput.

Sanjaš li možda vlastiti bazen? S IGPool-om tvoj san nikada prije nije bio bliže stvarnosti!
